

AIR HEATERS

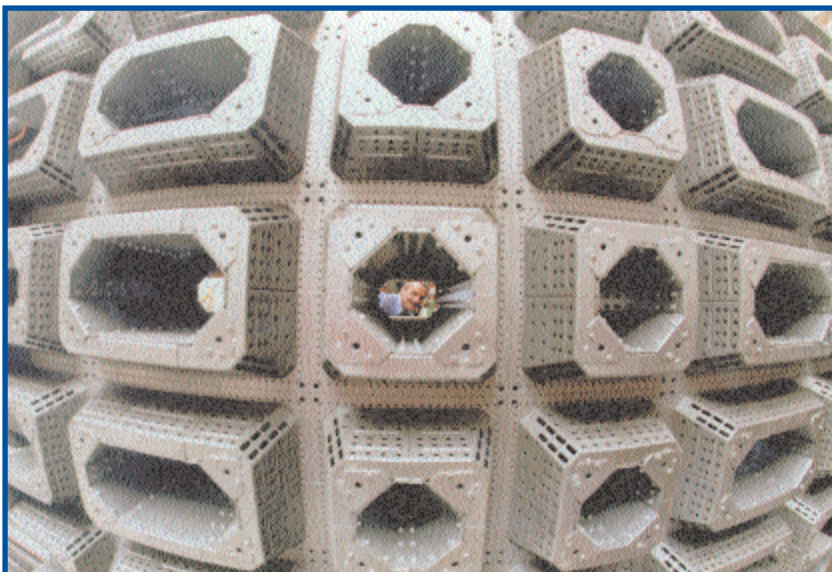

STREAMING AIR GAS AND/OR OIL AIR HEATERS

The streaming air heaters are widely used in different drying processes in the following fields: paper, textile, ceramic, print, tannery, bricks, etc.

The main advantages are:

- high thermal efficiency
- wide capacity regulating ratio

AIR HEATERS**INDIRECT EXCHANGE
AIR HEATERS**

The indirect exchange air heaters are used in the processes where hot air without any combustion products is required, particularly in the fields of: foods, chemicals, surface treatments, etc.
